

# MONOFLEX RESURFACE

Does your floor have outdated game lines and cracks across the floor? Is the paint wearing off and now you need to add a pair of pickleball courts? One of the best characteristics of the urethane floors is the ability to be resurfaced, unlike other types of synthetic sports floors that must be torn out and replaced. Monoflex Resurface helps keep the lifecycle cost low while reducing landfill waste.

# MONOFLEX RESURFACE

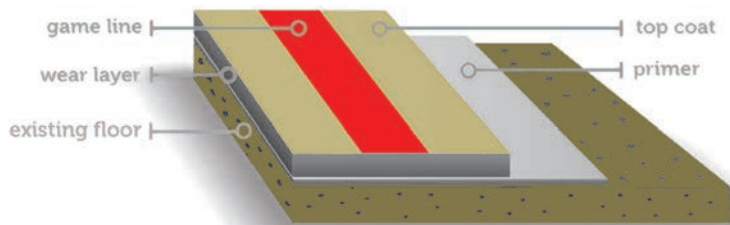

## Highlights

- Designed and manufactured in the USA
- Brings new life to old floors
- Low maintenance & low lifecycle costs
- Seamless surface, repairs old cracks and gouges
- FloorScore and LEED contributions
- Change colors, add games or logos

## Physical Properties

Surface hardness	80 shore A (+/-3)
Ball rebound	99%
Tensile strength	≥1358 psi
Elongation	≥153%
Tear strength	≥175 pli
Rolling load	>1,500Nm
Flammability	Class 1 inflammable

## Top Coat

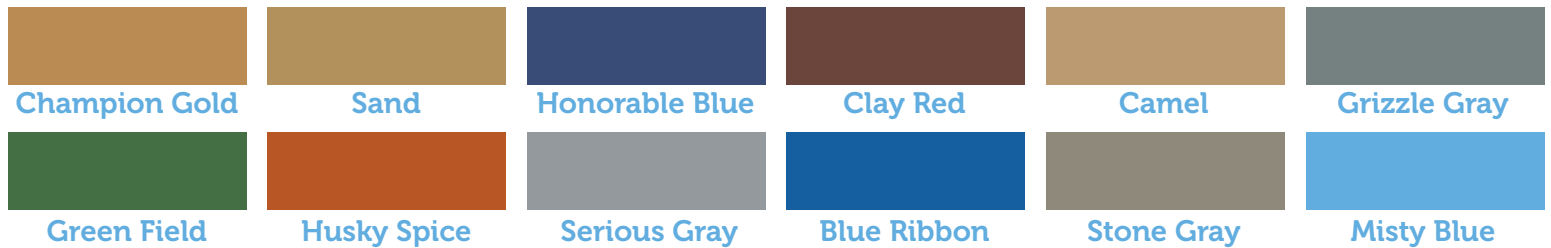

Water-based - Low VOCs

## Wear Layers

Rapid renewable formulation - No VOCs

Free of heavy metals

## Standard Floor Colors *Custom Colors Available*

## Standard Line Colors *Custom Colors Available*
